Sustainability

Success factors

In general, increasing availability and use of the internet should have

broadened the user base of the instrument.

Barriers Internet access is required to access information on the website. As the BERUFENET database is very comprehensive, users might be overwhelmed by the large amount of information.

Monitoring and evaluation Progress could be measured by internet traffic/number of users. However, no information is publicly available.

Updates

YES

In December 2015, the interface of the website was updated to improve user-friendliness.

Effectiveness No information is publicly available.

Sustainability BERUFENET is updated regularly. There is no indication that the Federal Employment Agency will discontinue this instrument, and the internet will remain important in the future, as a channel for gathering information on skills.
