

Pan-European Employment Projections: Individual Country Results

Presentation at the workshop on ANTICIPATING
EUROPE'S SKILL NEEDS,
2-3 November 2006, University of Warwick, UK
(Event organised within the framework of Cedefop's
international network on early identification of skill
needs "Skillsnet" (www.trainingvillage.gr)).

Rob Wilson

**Institute for Employment Research
University of Warwick**

Pan-European employment projections: Individual Country Results

- Standard classifications and definitions
- Standard tables
- Consensus on historical data & trends
- Key assumptions for the future:
 - Key drivers
 - Changing trends?
 - Other aspects for consideration

Standard Tables

- Sectors/industries
- Occupations
- Qualifications
- Replacement demands:
 - Retirement and mortality
 - Other outflows

Table 1: Sectors/industries

- Broad sectors, sectors and detailed industries
- Comparison with E3ME data levels (structure) and trends

Table 2: Occupations

- LFS based data
- Limitations and concerns
- Problems in identifying trends

Table 3: Replacement needs

- LFS based data
- Even greater problems and concerns
- Need to consider all kinds of outflows especially across national borders

Table 9: Qualifications

- LFS based data again
- Similar problems and concerns
- Difficulties in getting the required level of detail required
- Problems of comparability across country
