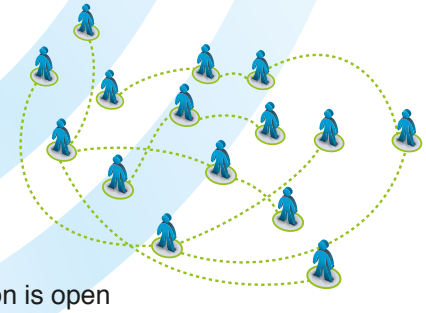
What we offer

ReferNet's work of collecting and monitoring information on national vocational education and training takes various forms:

- **policy reporting activities** give information on policy developments and reforms in vocational education and training, particularly in relation to agreed European priorities
- **country reports (VET in Europe)** describe the national vocational education and training systems of all participating countries
- **Spotlight on VET** is a series of flyers presenting the main features of vocational education and training in each country
- Online articles report on **national news** and specific topics related to training and labour market developments
- **bibliographic references** feed into Cedefop's bibliographic database (Vet-Bib), the largest collection of literature on vocational education and training, skills development and related labour market issues in the European Union.



This information is open to all citizens on Cedefop's portal:
www.cedefop.europa.eu

Who we are

Cedefop, the European Centre for the Development of Vocational Training, helps design and implement European policies on vocational education and training.
As an EU agency, we work with the European Commission, Member States and social partners.

To keep better track of developments in vocational education and training, in 2002 Cedefop set up **ReferNet**, a network of institutions across Europe representing the 28 Member States plus Iceland and Norway.
