

**OPEN INVITATION TO TENDER****AO/DSL/AZU-JBU/SkillsPanoramaUX/004/16****Request for Clarification (6) – Questions & Answers**

Question No 1

We just need to know if you are open to debate/change some basic prerequisites if results of our UX analysis shows it is necessary. For example different definition of target groups. Or different definition of overall sense/aim of the Skills Panorama project? Or this is something given and unchangeable? We'd like to know where are the limits for new contractor because it is not absolutely clear from the tender documents.

Cedefop's answer to question No 1

As per point 1.4 of the Tender Specifications, please be reminded that variants solutions to what is requested in the tender specifications are not allowed.

As per point 5 of the Tender Specifications, it is up to the tenderer to present in his Technical Proposal a detailed organisation and methodology such that they fulfil (comply in full with) all requirements outlined in the Terms of Reference.

The assessment of the technical quality will be based on the ability of the tenderer to meet the purpose of the contract as described in the tender specifications.

Further debate, analysis or fine tuning with the Skills Panorama team may also be needed at the start of the contract.
